Projects

PrepSync AI	Full Stack Developer	2025/01 - Present
• Developed an AI-powered platform to help students prepare for government examinations. • Implemented personalized study planning and AI-based roadmap generation features. • Integrated Google OAuth authentication for secure user login and account management. • Built mock test, current affairs and progress tracking modules. • Developed using HTML, CSS, JavaScript, Node.js and Firebase. • Successfully deployed the platform on Vercel for public access.		
Personal Portfolio Website	Frontend Developer	2025/01 - Present
• Designed and developed a responsive personal portfolio website. • Showcases technical skills, projects, achievements and professional profile. • Implemented modern UI/UX principles using HTML, CSS and JavaScript. • Optimized website responsiveness across desktop and mobile devices. • Deployed online to strengthen professional branding and recruiter visibility.		

Experience

National Service Scheme (NSS)	Unit Head	2024/03 - 2026/05
• Led and coordinated community service initiatives, awareness campaigns and volunteer programs. • Managed teams of student volunteers and delegated responsibilities for successful execution of events. • Developed leadership, communication and organizational skills through active participation and management. • Represented the NSS unit in institutional and community engagement programs.		
Entrepreneurship Cell (E-Cell)	Event Head	2025/05 - 2026/05
• Planned and managed entrepreneurship and technical events for students. • Coordinated volunteers, schedules and event logistics to ensure smooth execution. • Worked closely with faculty members and organizing teams during events. • Enhanced project management, teamwork and leadership capabilities.
